

Fulvic

Plant Doctor FULVIC is a unique organic liquid derived from some of the world most concentrated ancient organic deposits.

100% organic based ingredients, it is immediately available to plants, maximising mineral, fertiliser and trace element uptake that is otherwise locked up in the soil.

Plant Dr Fulvic is beneficial to good soil microbes, bad microbes simply disappear.

Promotes massive lateral root mass growth and helps the plant resist root rot diseases.

Plant Dr Fulvic is compatible with a wider range of materials, whether they are acidic or alkaline and is a most valuable input for creating a healthy well-balanced soil/growing medium for plants to thrive in.

REDUCES PLANT STRESS

DETOXIFIES VARIOUS POLLUTANTS

STRONGER HEALTHIER PLANTS

IMPROVE SOIL & FEED BENEFICIAL MICROBES

100% ORGANIC

Bio Stimulant

BENEFITS:

FULVIC can be applied to all plants, crops, trees, vines and lawns.

FULVIC can be mixed as a Chelator with almost all liquid fertilizers and liquid nutrients.

FULVIC can be applied to all soil types and pH ranges.

FULVIC is the 'brix builder'; this can reduce insect disease pressure.

FULVIC reduces wilt and plant stress

FULVIC stimulates root and shoot growth and increases germination and seed viability.

Better survival rate for seedlings, grafts, transplants and cuttings

FULVIC increases nutrient uptake.

FULVIC increases resistance to disease, insects, drought, heat and stress resulting in reduced crop loss.

FULVIC increases oxygenation and porosity in heavy soils.

Plant Doctor_x

USES

- When wilting occurs in the plant.
- Compatible with most other products (and chemicals) to increase uptake. (Jar test first)
- When organic carbon levels are low.
- When valuable soil nutrients are locked up and unavailable.
- When strong new root growth is needed.
- To minimize heat stress.
- To raise Brix levels
- Reduce disease incidence as a Preventative
- Apply with Fertiliser e.g. Potassium, Calcium, Copper or Iron liquid Fertiliser

APPLICATION RATES

APPLICATION RATE:

Can be used at any time of the year on all plants.

Apply rates below for best results. See our website for detailed application rate.

Description	Rate/1000Litre
Hydroponics	1 Lt - 2 Lt
Foliar	70 ml – 600 ml
Broad acre	3 Lt
Home Garden	4 - 8 ml per 10 Lt

Hydroponics:

Mix 1 – 2 part of Fulvic to 1000 parts of water

Foliar:

Mix 70ml (Turf) or 600ml of Fulvic to 1000 parts of water fine mist until run off

Broad acre:

Mix 3 Litre of Fulvic to 1000 Litre of water per hectare via Boom Spray

Home Garden:

Mix 4-8 ml per watering can

Apply weekly or fortnightly, as required
